Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/749,165

Applicant(s)

SOBOL, ROBERT E.

Examiner

Wes Tucker

Art Unit

2623

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-22 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 December 2000 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Response to Arguments and Amendments

1. Applicant's response to the last Office Action, filed February 23, 2004, has been entered and made of record.
2. Applicant has amended claims 10, 11, 12, 16 and 17 were amended. Claims 18-22 have been added. Claims 1-22 are pending.
3. Applicant's arguments have been fully considered and have necessitated new grounds of rejection. The use of Wang as a secondary reference in the 103 rejection is improper due to the common assignment of the present application and the U.S. Patent to Wang.
4. This action is therefore made non-final and a new rejection has been made.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-12, and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of U.S. Patent 6,445,819 to Kinjo and U.S. Patent 6,571,003 to Hillebrand et al.

6. With regard to claim 1, Kinjo discloses an image enhancement system, comprising memory for storing digital data that defines a graphical image (Fig.1, element 48) and a face detector configured to analyze said digital data and to automatically identify facial data within said digital data stored in said memory (Fig.2, element 100).

Kinjo discloses an image enhancer, but does not disclose automatically identifying a portion of said facial data that defines a particular facial feature and automatically enhancing an appearance of said facial feature within said graphical image.

Hillebrand discloses an image enhancer configured to automatically detect and locate defect areas in a face image and to create an improved or worsened area for each of the defect areas (column 2, lines 15-30). Once a face has been detected in a digital image, several different processes are used to change portions of that image in order to enhance the appearance of that image. Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to employ Hillebrand's facial enhancement system to modify all or part of the facial image detected in the face detection of Kinjo in order to enhance the appearance of that image.

7. With regard to claim 2, Kinjo and Hillebrand disclose input devices configured to receive an input. Kinjo discloses a scanner (Fig.1, element 12). Hillebrand discloses user input obtained from a user interface on what operations to perform and how to

determine facial portions to analyze and enhance (column 5, lines 30-42 and column 6, lines 29-42). In the combination of Kinjo and Hillebrand, Hillebrand's image enhancer would operate in accordance with the input configurations to perform operations on the image input received by Kinjo's input device. The portion of the image to be modified or the facial feature selected is based on these inputs.

8. With regard to claim 3, Kinjo discloses said image enhancer to process color correction, but does not specifically refer to color blending. Hillebrand discloses said image enhancer to manipulate portions of an image by blending color values associated with the defective portion with the color of the skin surrounding the defective portion (column 2, lines 25-30 and column 12, lines 13-18).

9. With regard to claim 5, Kinjo discloses said image enhancer, wherein manipulating said portion, sharpens said appearance of said facial feature (column 10, lines 65-67).

10. With regard to claim 6, Kinjo discloses said image enhancer, wherein manipulating said portion, changes a color of said facial feature (column 10, lines 60-65).

11. With regard to claim 7, Kinjo discloses said system including an image capturing device configured to receive an image of a scene and to produce said digital data based

on said image received by said image capturing device (Fig.1, element 12). In this embodiment the image capture device is a scanner.

12. With regard to claim 8, Kinjo discloses said image capturing device including a lens for receiving said image and an image converter for producing said digital data based on said image (Fig. 1, elements 12, 28, and 32). The scanner contains a CCD with lens (28) and analog to digital converter (32).

13. With regard to claim 9, the combination of Kinjo and Hillebrand applies as discussed in regard to claim 1. Claim 9 repeats the exact elements of claim 1 with the addition of claiming means. The means have already been disclosed.

14. With regard to claim 10, the combination of Kinjo and Hillebrand applies as discussed in regard to claim 1. Claim 1 cites all of the elements of claim 10 and differs only by the reference to a method by claim 10. The method used with the system is considered to be included in the system. Claims 11-17 also repeat the elements in claims 2-8 with reference to a method. With regard to depending claims 11-17, refer to claims 2-8 respectively.

15. With regard to claim 18, the combination of Kinjo and Hillebrand applies as discussed in regard to claim 1. Claim 1 cites all of the elements of claim 18, with the

exception of explicitly naming a facial skin blemish. Hillebrand discloses this feature (column 2, lines 17-22 and column 6, lines 1-5).

16. With regard to claim 19, Hillebrand discloses the image enhancer configured to locate at least one additional facial feature and locate said portion of said facial data defining said skin blemish by determining the likely proximity of said skin blemish to said located at least one additional facial feature. Hillebrand discloses several methods of sub-image determination (column 7, lines 16-40 and 60-65 and column 8, lines 5-10). Hillebrand discloses locating sub-images such as an under eye border and then discloses enhancing the image portion according to the defect type in that area such as wrinkles blemishes red spots etc.

17. With regard to claim 20, Hillebrand discloses the said blemish to be a wrinkle (column 8, lines 5-8).

18. With regard to claim 21, the discussions of claims 1 and 18 apply. The method is considered to be included in the system.

19. With regard to claim 22, the discussion of claim 19 applies.

20. Claims 4 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Kinjo and Hillebrand in view of U.S. Patent 5,835,616 to Lobo.

21. With regard to claim 4, Kinjo discloses said image enhancer, wherein manipulating said portion, applies various image processing techniques. Neither Kinjo nor Hillebrand expressly disclose blurring the appearance of the facial feature. Lobo discloses enhancing a facial image by blurring the image (Abstract). Lobo teaches that the blurring filter is used to better set forth the facial features of the image (Abstract). Blurring is a well-known image enhancing technique. Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to add blurring to the list of available facial feature enhancing techniques listed by Kinjo in order to better set forth the facial features of the image.

22. With regard to claim 13, the discussion of claim 4 applies. The method used in the system is considered to be included in the system.

Conclusion

23. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wes Tucker whose telephone number is 703-305-6700. The examiner can normally be reached on 9AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amelia Au can be reached on (703) 308-6604. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-5397.

Application/Control Number: 09/749,165
